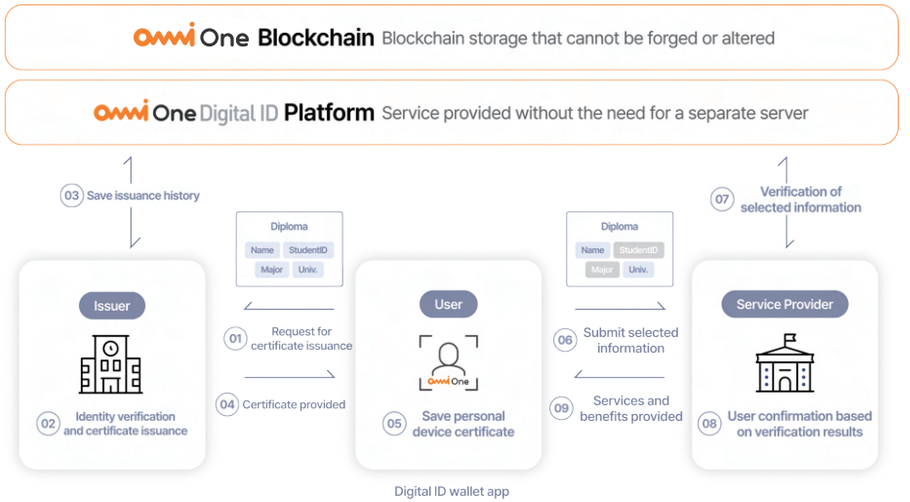
Service Concept Diagram



Case Studies

DID-based ISIC International Student Identity Card

- An ISIC International Student Identity Card that verifies student status and offers discounts and benefits
- Access to global benefits agreed upon by member countries of the ISIC Association
- Supports student discounts at partner establishments including international airfare, transportation, museums, restaurants, shopping, etc.

The OmniOne Digital ID service can be easily registered for and used without the need for system installation or setup.

For customers requiring closed networks, network separation environments, and enhanced internal security measures, an Enterprise on-premises version is also available.

OmniOne Digital ID

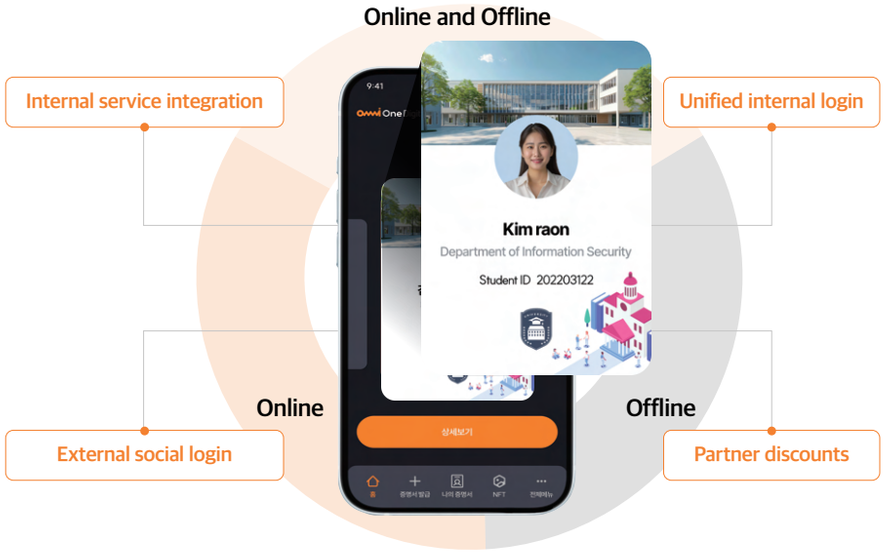
Platform for issuing and verifying identity and credentials

From certificate issuance to online/offline identity verification and partner benefits!

RAON

Service Introduction

This blockchain ID, issued based on identity information, can be used for identity verification and discount services both online and offline.



Service Features

Enhanced Personal Information Control

Individuals can store and manage their information directly on their smartphones, choosing only the necessary information to provide when verifying their identity.

Blockchain-based Decentralized ID

Personal identity information is securely stored only on the individual's smartphone, and the authenticity of identity information can be verified through blockchain.

Integrated Online and Offline Use

With a single mobile ID, you can conveniently and securely use it anywhere, online or offline.
