

Use Cases

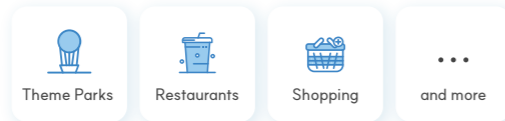

ISIC Digital International Student ID

- Official digital ID that verifies student status and provides discounts & benefits
- Recognized across ISIC Association member countries with access to global benefits
- Supports student discounts at partner merchants including airfare, transportation, museums, restaurants, and shopping

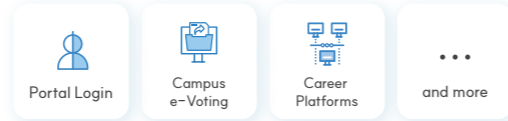

Kukkiwon Digital Dan Certificate

- An official digital credential proving Taekwondo black belt qualification with a single digital ID
- Offers secure, convenient verification and benefits anytime, anywhere
- Provides discounts for all age groups across diverse online and offline partners, including theme parks, shopping, and restaurants

Chung-Ang University Digital ID

- DID-based student ID that securely verifies Chung-Ang University student status
- Supports integration with key campus services such as portal single sign-on, electronic voting, and career platforms
- Extends usability to external services including partner discounts, providing a practical authentication tool

OmniOne Digital ID can be accessed through a simple subscription process without separate system installation or deployment.

For customers requiring enhanced security such as closed networks, network-separation environments, or strict internal security controls an enterprise deployment model is also available.

Platform Overview

OmniOne Digital ID is an integrated Identity & Credential Issuance and Verification Platform supporting everything from certificate and credential issuance to online/offline identity verification and partner benefits.

OmniOne Digital ID is a blockchain-based ID issued on verified identity information. It enables seamless identity verification both online and offline, while also providing access to discount and benefit services.

Key Advantages

SaaS with No Deployment Burden

Start issuing and verifying digital credentials instantly with just a subscription—no need for separate system setup. This reduces both initial costs and implementation time.

Standard App & Digital Wallet SDK

Apply services immediately with the OmniOne standard app, and integrate easily with institution- or enterprise-specific apps through the provided digital wallet SDK.

Easy Integration with APIs

Seamlessly connect with existing issuance and management systems via standard APIs for fast and simple integration.

Benefits

Partner Benefits

Leverage issued digital IDs to connect with partner services, offering users discounts and exclusive perks.

Secure Real Time Identity Verification

Strengthen security by allowing users to selectively share only the necessary information for real-time identity verification across online and offline channels.

Enhanced User Convenience

Seamlessly link a wide range of online and offline services to improve user experience.

Data Driven Marketing

Collect reliable customer data to enable personalized and targeted marketing strategies.

Key Features

| | | |
|---|--|--|
| <p>Empowered Data Ownership</p> <p>Users securely store their own information on their smartphones and can selectively share only the data required for identity verification.</p> | <p>Blockchain Based Decentralized ID</p> <p>Personal identity information is safely stored only on the user's smartphone, while blockchain technology ensures authenticity and integrity of the data.</p> | <p>Seamless Online & Offline Use</p> <p>With a single mobile ID, users can easily and securely verify their identity across both online and offline environments.</p> |
